Problem   The current DBOs of the EDF development databases are not consistent with the baseline for mini-DAAC, VATC and DAACs.							Tech Reference	Tech Reference				
Problem The current DBOs of the EDF development databases are not consistent with the baseline for mini-DAAC, VATC and DAACs.  Proposed Solution Request RTSC change the DBOs on the Sybase servers/databases using the attached table. Request RTSC not delete the Sybase logins which were previously DBOs. These should continue to be valid logins. Request RTSC coordinate with each Development POC when the database DBO change is to take place. Request RTSC make the default database for all changed DBO logins be "master" to avoid the incorrect use of a database after login. Users must enter a "use <databases" additional="" affected:="" after="" analysis:="" approved="" arch="" boo="" c="" chief="" comments:<="" contracts="" cost:="" d.="" date="" development="" disposition="" ecs="" eng="" fos="" impact="" in.="" johnson="" large="" loc="" log="" logging="" manager="" mao="" marerials="" medium="" michelle="" none="" off="" office="" organizations="" originator="" rel.="" royal="" scdo="" secure="" security="" signature="" smell="" statement="" subcontrol="" sys="" td="" vet="" white=""  =""><td></td><td></td><td></td><td>- Dead</td><td><del></del></td><td></td><td>N/A</td><td></td><td></td><th></th><td></td></databases">				- Dead	<del></del>		N/A
